Where in the world are we?

What businesses are we in?

- Automotive
- Mining
- Steel
- Aluminum
- Metalworking
- Coatings
- Management Services

Where are QUINTOLUBRIC® Longwall fluids being used?

- Australia
- Germany
- United States
- France
- Slovak Republic
- Slovenia
- Spain
- Turkey
- Poland

Are our customers satisfied?

- Highest customer retention among all longwall fluid suppliers
- Fastest growing marketshare among all longwall fluid suppliers
- Not one incident of fluid related bacterial growth in over 27 years of business
- "We think the Quaker product is more environmentally friendly... We have had excellent success with Quaker."

- Pete Hendrick,
President, Speed Mining

So, why should I work with Quaker?

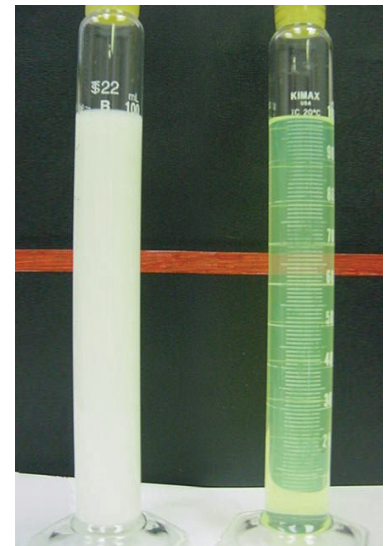

QUINTOLUBRIC® longwall fluids reduce the total cost of running your longwall by:

- Extending equipment life
- Eliminating bacteria
- Reducing filter costs
- Reducing the environmental risk

Rated 2002 Product of the year by *Lubricants World Magazine*.

Why are we different?

The difference is clear.

The QUINTOLUBRIC® longwall fluid, on the right, is a microemulsion—meaning it mixes easier, is more stable, and filters easier than the competitor's milky macroemulsion shown on the left.
